

COVID-19 & Assistive Technology

During these uncertain times, the Assistive Technology Department would like to help you as much as possible. We are still open, and trying to limit contact with clients to help minimize the spread of COVID-19. We realize that life does not stop and that children are still in need of care.

We are dealing with issues or concerns regarding equipment on a case by case basis. **Please contact Tara at 204-258-6661 to help find a solution.**

Here are some tips about postural care for your child:

- Try to position your child in a straight/midline position making sure spine is straight and head is over neck (not off to one side)

- Keep legs apart, avoid legs crossing.

- Frequent position changes throughout the day to minimize skin injury and improve breathing.

Visit the following link for more information regarding positioning.
