

## **Right Torticollis**

- Carry your baby on his or her RIGHT side, with his or her back against your body.
- Use one hand to support your baby between his or her legs.
- Rest your baby's head on your RIGHT elbow.
- Tilt your baby's head so that the LEFT ear moves towards the LEFT shoulder.

Gently hold this stretch for at least 30 seconds, or as long as your baby tolerates. This may be up to a few minutes at a time.

If your baby is not relaxed, take a break and try again a few more times.

Repeat this stretch 5-6 times per day, making it part of your baby's routine.
